Artistic assignments Costume Design 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments on the Academy's main campus and two days of artistic assignments and interview in the Costume Design studio.

For the artistic assignments, you will work on different creative assignments in the costume design studio and participate in a personal interview with different teachers. During these two days, we want to gain insight into your artistic processes, knowledge and skills.

Your creative development is our focus. You will be assessed on your drawing skills, your spatial insight, your conceptual thinking and your communication skills. We ensure that these days are not just an assessment moment, but also an opportunity for you to feel confirmed that costume design is the right match for you.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
