

Artistic assignments Fashion 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments in the main campus of the Academy and two days of workshops in the studio of the fashion department.

During your two days in the fashion department, you will work with other prospective students and some tutors on creative assignments in various workshops. We want to create a dynamic, active and creative environment in which you get to know the other candidates and teachers. During these two days, we want to gain insight into your artistic process, knowledge and ability. Moreover, this setting approaches a more realistic picture of the fashion department as a school environment.

You will be assessed on your drawing skills, your creative skills, your 3D interpretation skills, your interests in art and fashion, and your communication skills. We ensure that these days are not just an assessment moment, but also an opportunity for you to feel reassured that fashion is the right match.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
