

# Artistic assignments

# Fine Arts In Situ 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments on the Academy's main campus and two days of workshops in the In Situ studio.

In the studio, you will work with other prospective students and teachers on a three-dimensional assignment in different materials and techniques. We want to gain insight into your artistic process, knowledge and skills during these two days. Moreover, this way we aim to create a dynamic, active and creative environment in which you get to know the other prospective students and teachers. The setting approaches the atmosphere of In Situ as a school environment.

You will be assessed on your drawing skills, your creative skills, your spatial insight, your interests in art and your communication skills. We ensure that these days are not just an assessment moment, but also provide an opportunity for you to feel confirmed that In Situ is the right match for you.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
