

Artistic assignments

Fine Arts Sculpture

2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments on the Academy's main campus and two days of workshops in the Sculpture studio.

In the studio, we explore your artistic qualities and interests. Together with the other prospective students, you will work on various sculpture and drawing assignments and you will meet the lecturers. These two days in our inspiring studio environment will immerse you in the fascinating world of sculpture.

Your creative development will be our focus. You will be assessed on your drawing skills, your spatial insight, your artistic knowledge and, above all, your motivation. We ensure that these days are not just an assessment moment, but also an opportunity for you to feel reassured that sculpture is the right match.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
