

Artistic assignments Graphic Design 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments in the main campus of the Academy and two days of workshops in the Graphic Design studio.

In the studio, you will work with other prospective students and some teachers on artistic assignments. We want to create a dynamic, active and creative environment in which you get to know the other candidates and teachers. During these two days, we want to gain insight into your artistic process, knowledge and skills.

You will be assessed on your drawing skills, your creative skills in different aspects of graphic design, your interests in art and design and your communication skills. We ensure that these days are not just an assessment moment, but also an opportunity for you to feel reassured that graphic design is the right match.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
