

Artistic assignments Jewellery Design 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments on the Academy's main campus and two days of artistic assignments and interview in the Jewellery Design studio.

In the studio, you will work with other prospective students on a creative assignment. We want to create a dynamic, active and creative environment where you get to know the other candidates and the teachers. During this day, we want to gain insight into your artistic process, knowledge and skills. There will also be time to discuss your portfolio, your writing assignment, your motivation, interests and insights with the various teachers.

You will be assessed on your drawing skills, your creative skills, your spatial insight, your interests in art, jewellery design and silversmithing, and your communication skills. We ensure that these days are not just an assessment moment, but also an opportunity for you to feel reassured that jewellery design is the right match.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
