

Artistic assignments Painting 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments in the main campus of the Academy and two days of workshops in the Painting studio.

During the two days of the artistic test, we create a dynamic, active environment where you get to know the other candidates and the teachers. During these two days, we want to gain insight into your skills. You will work on site on a series of assignments with a focus on working by observation. During these days, you will also be invited for an individual interview with the teaching team.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
