

Artistic assignments Photography 2024

For enrolment in academic year 2024-2025

The entrance test provides one day of drawing assignments in the main campus of the Academy and two days of workshops in the Photography studio.

During the artistic assignments in the photography studio, we aim to gain insight into your artistic process, knowledge and skills. You will be assessed on imagination, on your analytical ability and on how you can articulate something in image and in language. Communication skills are also important. We expect candidates to have a serious interest in general culture and a specific focus on art and visual culture.

You will receive practical information on location, time and materials needed along with the invitation to the artistic assignments.
